## *BITCHO – Supra*

*BITCHO – Supra* assumes the use of a virtual reality (VR) headset and will be experienced individually people by circulation through space, with the entry of 4 people every 10 minutes.

The show is not recommended for people susceptible to photosensitive epilepsy, with other types of photosensitivities or with implanted electronic medical devices (pacemakers, for example).

You will be able to explore the space while enjoying the VR experience. However, please keep in mind the following:

- Please leave all belongings in the designated place for this purpose for the duration of the performance;
- Please turn off all electronic devices, including mobile phones and watches;
- Photographs, audio and video recordings are prohibited;
- The room assistance will help you in setting up the VR equipment. You can adjust the headset for a better fit, but be careful not to touch any sensors or buttons;
- There is a button on the equipment that allows you to adjust the audio volume;
- If you experience discomfort, such as nausea, eye pain or loss of balance, close your eyes. If it does not improve, remove the glasses and inform that you need assistance;
- In case of overheating of the headset, inform the room assistance;
- If you encounter a technical problem during the VR presentation, such as a frozen image, please raise your hand and room assistance will help with the problem;
- In case of emergency, follow the instructions provided by room assistance.
